Customer Piping Pressure Test Form for Reinstatement of Natural Gas Service

Instructions

In accordance with City of Danville Code Section 38-82, reinstatement of natural gas service that has been disconnected for 120 days or longer shall be withheld until a successful air pressure test is complete to check for leaks.

The purpose of the form is for the customer or their designee (plumber or contractor) to document the results of the test for submittal to Danville Utilities prior to reinstatement of service. The form does not replace plumbing permits or inspections as required by the City of Danville Inspections Department.

Pressure Testing should be performed in accordance with Virginia Fuel Gas Code 2012 Edition Section 406.

For single family residential customers receiving standard delivery pressure, the following test is acceptable:

- 10 psig air test for 15 minutes with no loss of pressure as viewed on a test pressure gauge
- Appliances and equipment shall be physically disconnected from piping system and piping outlets capped.
